Making Istio accessible

12

Sessions presented in **Chinese**, transmitted also on **Bilibili** platform.

4

Workshops for providing hands-on practice with specific tools/platforms

3

Listening sessions where users provided feedback on specific developments in the project.

51

Sessions presented in **English**, with **captioning**.

Participant feedback

The majority of participants agree that they had **enough information** about the **future of Istio project.**

Participants agreed that **captioning was very helpful** for the non-native English speakers.

Most participants felt **empowered to use Istio** after attending the conference.

"Need more workshops! :) "

"Wonderful event and speakers,looking forward to join future events"

"I enjoy the single track mode of this conference as well as the very quick access to playbacks. It allows me to not have to choose between sessions but if I do I have very quickly access to the playbacks."

"Great to see how common problems were solved by other community members through the various istiocon sessions, really informative!"

"This is the best conference software i've used, and i've been to so many virtual conferences in the past two years. Super simple to register and navigate through live and recorded sessions"
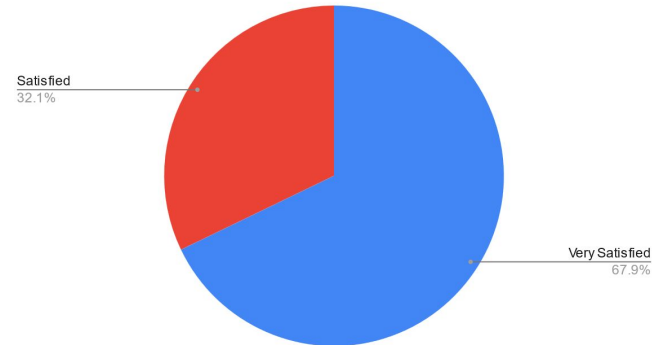

Networking event

Space Escape

Escape room focus on having fun time and teamwork, where participants solve together different challenges.
